### **Testimonial for CS4B**

As a start-up business CS4B have been invaluable to our success. From their initial advice on our IT systems requirements, supply of hardware/software and ongoing support service, they have impressed us in all areas.

We had initially underestimated our IT requirement but with CS4B's advice we got our IT set up correctly from the start. This has saved us both time and cost as we would have needed to upgrade our IT infrastructure far earlier than we had anticipated. Their solutions have offered us the flexibility to access our systems from the office, from home or whilst 'on the road'.

On the occasions that we have had technical problems they have resolved the issues promptly and have often assisted us outside of core business hours. Our business is totally dependent upon our IT systems so the benefit of being supported by CS4B has been invaluable to us.

As our business has grown they have assisted us with additional solutions in a cost effective manner. This allows us to fully concentrate on our core business and leave all our IT problems to the professionals at CS4B.

Their staff are very efficient, professional and polite. We would have no hesitation in recommending their services to any business large or small.
