

Testimonial for CS4B

To Whom It May Concern:

As the Centre Manager of Basepoint Business Centre in Tewkesbury, with the potential of having 74 different businesses on the premises, I have been very impressed with the services that CS4B have offered incoming tenants. Not only have they guided non-technically minded start-up companies through their initial set-up but they have gone on to provide individually tailored packages to both these new companies as well as to several of the established companies that have moved here from other premises.

In addition, they have come to our assistance on more than one occasion when our own support provision response has been delayed and helped to rapidly resolve issues in a calm and professional manner. Their customer care is exemplary and the informal training sessions we have received have been clear, comprehensive and thankfully jargon free!

Kate Harrison
